Graduate Research Conference 2015 by the numbers…

Graduate students from various departments participate in scholarly research every year. Research is important to help develop new ways of analyzing complex problems in society. Graduate students present their findings during the annual Graduate Research Conference which consists of a 2 day symposium and satellite events.

What graduate students have to say…

“The GRC helped me practice my presentation skills and exhibit my ideas before I took them to a national conference. It was a great professional experience. I really enjoyed seeing and hearing the fantastic research being pursued by my peers in the History Department and in other programs at the GRC.”
Michael Verney, Graduate Student Senate President & PhD Candidate, History

“The GRC provides a great opportunity for graduate students to take a look at research outside of their own building. The poster session was a largely diverse affair with many different programs and fields of study, allowing a graduate student to simply wander through the vast scope of UNH’s graduate research.”
Kelly Nifong, Graduate Student Senate Clerk & Masters Student, Earth Sciences
GRC Fast Facts:
1) The GRC grew by 11.3% from 2014 to 2015 (poster/oral presentations)
2) The GRC has been promoting Graduate Student Research for 12 years
3) 283 students participated which represents 14.5% of students (1,951 grad students total)
4) Dissertation Year Fellowship recipients as well as research, teaching, and creativity awards are recognized during the poster session.
5) The Keynote Speaker at this year’s GRC was Faculty Mentor Award Winner: Professor Don Hadwin.

Please join us next year for the 2016 Graduate Research Conference
